

Armando Meabe

TL | .NET Developer | AI Expert

Armando is a seasoned software professional with extensive experience in leading and developing complex technology solutions. His career spans roles such as Technical Leader at Globant, where he managed AI-based products integrating Python and .NET APIs, and Engineering Team Lead at Unily, overseeing projects with .NET, Azure Cloud, and Angular technologies. He has also excelled as a Solution Architect at Grupo Sancor Seguros, applying his expertise in .NET and VueJS. With a background in .NET, SQL Server, and various other technologies, Armando demonstrates a strong ability to drive technical innovation and manage diverse development teams effectively.

EXPERIENCE

CloudX@EY — TL, Sr. .NET AI Developer

2024 - 2025

- AI Architect and Technical Leader
- Design AI architecture for the project (DocuSmart) completely from scratch. Also design the original project timeline and every related task and module.
- Discuss with the internal client about the scope of the project, how AI can and can't help, what to expect from the tool
- Perform as a senior AI developer

Globant — AI TL

2020 - 2024

- Lead a small development team for a complex AI-based product
- Act as developer in these projects Integrate and manage diverse technologies such as MS Semantic Kernel, .NET APIs with Microsoft ML.NET and local on-premise AI models
- Instruct, coordinate and facilitate collaboration among developers with varying levels of experience and backgrounds

SBS Librerías SRL — AI Expert

2020 - 2024

- Develop and integrate local AI models using Ollama and C++.
- Implement AI solutions within a .NET and C++ development environment.
- Utilize Microsoft ML.NET for machine learning tasks and embeddings improvement.
- Measure the quality of AI-generated responses.
- Fine tune models with custom data.

SKILLS

- **Software Development:**
 - Proficiency in .NET, C/C++, C#, and Golang
 - Front-end development using Angular, AngularJS, Vue.js, and Bootstrap
 - Full-stack web development, including MVC.NET and .NET Core
 - Cross-platform mobile development with Xamarin and Xamarin Forms
 - RESTful API and web service development
- **Database Management:**
 - SQL Server expertise
 - Knowledge of database design and optimization
- **Cloud Computing:**
 - Azure Cloud services
 - Serverless functions
- **Version Control and Continuous Integration:**
 - Git and standard Git flow
 - Jenkins and SonarQube for continuous integration
- **Software Architecture and Solution Design:**
 - Solution architecture
 - Migration strategies, including strangler pattern
 - Microservices architecture
- **Research and Development:**
 - Research and development of software projects
 - Scientific development and academic speaking
- **Consulting:**
 - External consulting in .NET and SQL Server
 - Specialized knowledge in NHibernate ORM
- **Tools and Technologies:**
 - Smart Cards
 - SQLite
 - Async rest clients

Globant (Guggenheim Partners) — .NET Sr. DEV

2024

- Lead a small development team for a complex AI-based product.
- Act as developer in these projects.
- Integrate and manage diverse technologies such as MS Semantic Kernel, .NET APIs with Microsoft ML.NET and local on-premise AI models.
- Coordinate and facilitate collaboration among developers with varying levels of experience and backgrounds

Globant (EY) — TL

2023

- Lead a development team for a complex AI-based product (multi-source expert AI based chatbot)
- Integrate and manage diverse technologies such as Python and .NET APIs, Azure Functions, Azure Durable Functions, ChromaDB.
- Act as developer in these projects.
- Coordinate and facilitate collaboration among developers with varying levels of experience and Backgrounds

Globant (DOJO) — .NET Developer

2023

- Participate in training courses on artificial intelligence and Microsoft Azure AI-based products.
- Develop applications using .NET technologies and open source AI local models

Unily — Engineering Team Lead

2023

- Lead an engineering team in the development of AI based add-ons for automatic content generation on a custom CMS (automatic generate of news, re-write of content, graphql queries generation for automatic banners and other components based on simple prompts).
- Develop, deploy and manage applications on Azure Cloud.
- Develop and maintain applications using .NET, serverless functions, SQL Server, Angular, and AngularJS.
- Tools/Technologies: .NET, Azure Cloud, serverless functions, SQL Server, Angular, AngularJS

- Various development tools and frameworks
- **Cross-Platform Development:**
- **Experience in both native and cross-platform mobile development**
- **Innovative Problem Solving:**
- **Innovation in software development And algorithm design and optimization**

LANGUAGES

Spanish (Native)

English (Upper Intermediate)

KEY INDUSTRIES SERVED

- **AI and Machine Learning**
- **Cloud Computing**
- **Financial Services**
- **Insurance**
- **E-commerce**
- **Healthcare**

SBS Librerías — *Freelance Developer*

2023

- Develop customized solutions using C/C++ and Spotify's ANNOY (Approximate Nearest Neighbors Oh Yeah) algorithm for AI
- Design and develop user interfaces with Bootstrap and Vue.js.
- Develop backend applications using .NET Core LTS versions.
- Tools/Technologies: C/C++ (AI based on Spotify's public ANNOY algorithm), Bootstrap, Vue.js, .NET Core

KDSoft — *IT Manager*

2023

- Manage and oversee software development projects, code quality.
- Design and implement an AI based chatbot for citizen service.
- Develop applications using .NET and SQL Server.
- Coordinate the development of frontend applications with Angular and AngularJS.
Review code Quality
- Tools/Technologies: .NET, SQL Server, Angular, AngularJS

Grupo Sancor Seguros, Prevención Salud — *Solution Architect*

2022 - 2023

- Design architecture for technology solutions using .NET and SQL Server.
- Apply a strangler pattern to migrate the company to a microservices based schema.
- Coordinate development teams to ensure quality and adherence to deadlines.
- Tools/Technologies: .NET, SQL Server, Vue JS 3.x

Mercado Libre SRL — *Sr. Software Engineer*

2022

- Develop backend applications using GO (golang) and MySQL.
- Develop and maintain user interfaces with Vue JS and Angular.
- Implement continuous integrations using Jenkins and SonarQube.

Grupo Sancor Seguros, Prevención Salud — *Technical Leader, Release Manager*

2019 - 2021

- Lead development teams in implementing solutions using .NET Core and VueJS 3.
- Manage the software release process, ensuring quality and in-time delivery.

Grupo Sancor Seguros, Prevención Salud — Sr. Software Engineer

2018 - 2019

- Develop applications using MVC.NET, VueJS, NHibernate, and SQL Server.
- Collaborate in the design and implementation of software solutions.
- Huenei IT Services,

Wintime SRL and WhitePrompt — Sr. Xamarin Developer

2015 - 2018

- Develop mobile applications using C#, .NET, and Xamarin.
- Implement mobile databases using SQLite.
- Develop asynchronous REST clients for mobile applications

Goctors — Role and Seniority

2018 - 2019

- Develop web applications using MVC.NET, AngularJS, and SQL Server.
- Participate in the design and development of backend solutions.

Kinetica Solutions S.R.L.,— Sr. Software Developer

2015

- Develop web applications using .NET MVC, CSS, JS, JQuery, and REST services.
- Implement web services and develop user interfaces with HTML5.

FESP – Ministerio de Salud de la Nación — External .NET specialized consultant

2014

- Provide specialized consulting in .NET development.
- Develop applications and solutions using .NET and SQL Server.
- Implement ORM with NHibernate.

Shovel Apps Incorporated — Architect and Co-Founder

2013-2014

- Design and develop software architectures using C#, MVC.NET, and SQL Server.
- Design user interfaces with HTML5, CSS, JS, and JQuery.
- Coordinate and lead the development team

Diveria SRL — Ssr Full Stack developer

2010 - 2012

- Develop full stack applications using C#, MVC.NET, HTML5, CSS, JS, JQuery, and SQL Server.
- Develop applications in C++ using Qt4 and Smart Cards.

Microsoft Argentina — *Researcher, Scientific Developer, and Academic Speaker*

2009 - 2012

- Conduct research in software development technologies.
- Develop applications using C#, MVC.NET, HTML5, CSS, JS, JQuery, and SQL Server.
- Participate as a speaker at academic and scientific events
- Tools/Technologies: C#, MVC.NET, HTML5, CSS, JS, JQuery, SQL Server, C++
